

DASC 5333 Database Systems for Data Science
CSCI 4333 Design of Database Systems
Spring 2023
Homework #4

UML Conceptual Model to Relational Logical Model

(1) Using the [suggested UML solution](#) of Homework #3 (*not* your own solution) and the specification of HW #3, construct the relation schema to implement the ER diagram). For each relation, underline the PK and list:

1. all candidate keys: e.g. [1] FacultyId, [2] {FirstName, LastName, DepartmentNumber}
2. all foreign key references: e.g. [1] ChairFacultyId references Faculty[FacultyId], [2] StudentId references Student[StudentId]
3. Attributes known for sure that can be null [i.e. Nullable]: e.g. [1] MiddleInitial, [2] Phone

Use [h4sol_template.docx](#) as the template. Rename it as H4_<<Your name>>_<<Your Student ID>>.docx and submit your homework through Blackboard.
