

Team Nexus

Minutes of Meeting – 10/07

- Confirmed that we are following the right path with building the Market Data Agent and presented the working of the demo with code workflow.
- Able to fetch the options data from the API in raw format and filtered the required data
- Able to integrate the initial input to backend and represented the options output in different sample page
- Asked to Integrate in main page and the working demo so far is successful.

Next Sprint Plan:

- Prepare for the working demo
- Integrate fetched options data to main page UI
- Be ready with presentation slides
