Homework #6 Functions and lists

This assignment involves user-defined functions, lists, and modules. There are two parts.

[1] Write a python module `list_op` (i.e., `list_op.py`) which contains four functions of lists of numbers. You should use the following shell and follow the instructions there: [list_op_shell.py.txt](#) (save as `list_op.py` and then complete it).

[2] Write a Python program `h6.py` to run five test cases for each function. You should follow the instructions in the shell [h6_shell.py.txt](#) (save as `h6.py` and then complete it).
